

| KEY BENEFITS | | FEATURES |
|--------------|---|--|
| 1 | STUNNING PERFORMANCES | Dualys is one of the fastest printer in the market, and the next generation model provides top-of-the-range performances and higher image resolution. |
| | | <ul style="list-style-type: none"> > The Dualys³ generation comes with a new CPU and printhead for outstanding graphics and image definition, with an incremental factor of 100 when compared with the earlier version. > Dual-sided printer, with a 125 card/hour print speed in color (YMCKO-K), Dualys provides premium performances in its category. > The printer is loaded with a 16MB memory for optimized operations. This enables RAM storage of both sides of a card and a self recovery process in case of disruption: data integrity is preserved and any job in progress will automatically resume. > A "Color Profile" feature provides the user with a color matching filter which prints colors similar to those displayed on the screen. |
| | | Options are available on demand to enhance connectivity or benefit from multiple encoding options. Evolis offer modular and scalable solutions that fit any specific customer needs by combining the appropriate options, drivers and encoding technologies. Dualys benefits from this true customization process. |
| | | <ul style="list-style-type: none"> > Dualys features a standard USB port and is conveniently shipped with an interface cable. An IP-based Ethernet port is also available as an option to bridge Dualys to a LAN, just like any conventional paper printer. > Dualys supports all main OS (Windows 2003, XP and Vista, Mac OS X and Linux), for seamless integration in various IT environments. > Distributors and System Integrators are encouraged to ask Evolis to investigate special features that extend the market scope of this model and help meeting specific requirements for various applications such as Transportation, Banking or Biometric Identification. > Dualys offers a manual feeding option to personalize cards individually. This feeder, powered by an engine, can be instantly installed and turns Dualys into an over-the-counter display for instant delivery of badges, by the unit. With such an easy personalization process, Dualys stands as the best choice for Ticketing, Membership Cards, student IDs and other similar applications > Dualys offers the widest range of encoding options: 3-track magnetic encoder in Hico/Loco (ISO or JIS2), smart contact station encoders and contactless encoding units. All these features can be seamlessly combined. |
| 3 | USER-FRIENDLY DESIGN | Both the printer and the software have been designed with user needs in mind. Forget Training, this is a Plug & Print solution. |
| | | <ul style="list-style-type: none"> > The Windows driver and the setup process have been totally reshaped to improve the user interface. The set up wizard leads the user through simple step-by-step instructions, while basic configuration is easily performed. The driver comes with a 'Print manager' for enhanced interactivity through on-screen instant notifications that complement the 4-LED information panel. > Dualys benefits from the market-proven concept of a clamshell opening that speeds and eases any printing task such as ribbon installation, cleaning, and card thickness adjustment. Users operate the service by themselves on a daily basis, which minimize downtime. > The detachable airtight card feeder makes it possible to stock several feeders with different card background themes and/or thicknesses, or to enforce printing continuity by simply replacing an empty feeder by a full one. > Compact and light, Dualys is a follow-me printer and dedicated travel bag is available to carry it with you. |
| | | Dualys is engineered to last thanks to strict selection of components and advanced quality testing. Dualys reproduces vivid natural colors and images with an outstanding rendition. A hassle free and very reliable solution ! |
| | | <ul style="list-style-type: none"> > Dualys³ offers a high quality finish, our strict requirements being reflected in its injected plastic case and in the quality of the assembly of the different printer modules. In addition to this, prior to any delivery, each Evolis printer is fully tested and adjusted to maximize printing quality. > Dualys offers photo quality printing thanks to its carefully selected components and state-of-the-art picture management process. The innovative flip-over station enables dual-sided personalization without compromising printing throughput. > Both the printer and the print head come with a full three-year warranty, a proof of Evolis' commitment to making quality a top priority for offering the best conditions. |
| 4 | OUTSTANDING QUALITY AND RELIABILITY | <ul style="list-style-type: none"> > One ready-to-use package at your doorstep: printer, cleaning kit, cable and card design software. All included standard ! > eMedia Card Designer software is delivered standard. From the very first time you use Dualys, you can personalize and print badges using an Excel database and the Data Import/Export feature. A truly professional solution is delivered with the printer ! > A comprehensive ribbon offering, including a half-panel color ribbon that slashes cost by 40% compared to the standard ribbon. Monochrome printing benefits from a ribbon saver system that increases ribbon capacity by 2 to 3. The best 'cost per card' ratio in the market. > A 3-year warranty, the best one in the market ! With no hidden cost, Evolis products will keep its users satisfied for years. |
